SUPPLEMENTAL ITEM

TO: MEMBERS OF THE INVESTMENT COMMITTEE

- I. SUBJECT:** Internally Managed Domestic Fixed Income
(Quarter Ended March 31, 2008)
- II. PROGRAM:** Domestic Fixed Income
- III. RECOMMENDATION:** Information Only
- IV. ANALYSIS:**

Attached is a report that reviews compliance of the internally managed domestic fixed income portfolio to approved policy guidelines for the quarter ended March 31, 2008.

The Investment Committee approved the "Statement of Internally Managed Dollar Denominated Fixed Income Policy, Guidelines and Procedures" at its May 13, 1996 meeting. As recommended by the Investment Policy Subcommittee, these guidelines require at least quarterly reporting on relative duration, sector weightings, and violations of the policy.

Section I of the report graphically displays interest rate risk of the portfolio by comparing its duration relative to that of its benchmark, the Lehman Long Liability Index (LLL). Duration is a measure of price sensitivity to interest rate changes. It is the percentage change in price given a 100 basis point (1 Percent) move in interest rates. As indicated in the graph, the portfolio is well within the guideline of $\pm 20\%$ of the Lehman Long Liability on an option adjusted basis.

Section II of the report depicts the sector risk of the portfolio. Sector risk is the risk of holding proportions of asset class sectors that differ from proportions in the benchmark index, the Lehman Long Liability. The table lists the permissible range for weightings in each sector, and sector weightings of the Lehman Long Liability and this portfolio. The portfolio is within approved guidelines.

Section III of the report describes violations of the overall policy and guidelines, including investing only in permissible securities and compliance with specified restrictions. There were no violations of policy or guidelines during the quarter ended March 31, 2008.

V. STRATEGIC PLAN:

This item supports Goal VIII: Manage the risk and volatility of assets and liabilities to ensure sufficient funds are available, first, to pay benefits and second, to minimize and stabilize contributions.

VI. RESULTS/COSTS:

The market value of the internally managed domestic fixed income portfolio as of March 31, 2008 was \$58.4 billion. This agenda item provides a review of portfolio compliance to its guidelines.
